About me

Frontend developer with experience in building webapps based on Vue, React.js and Pure HTML + CSS + JavaScript. Currently working as a Full-Stack Dev with Nuxt + Node at Bitpod. Love to experiment with modern technologies, promote Open Source and an *Occasional Blogger*. Looking forward to starting my journey as a frontend developer at a company which will not only challenge me but help me develop my skillset further.

Professional Experience

Trainee Engineer - FullStack, Bitpod [🔗](#)

Nov 2020 – present | Vadodara, India

- Work on developing a Low Code platform used to power Event app by Bitpod.
- Core stack uses Nuxt, Node, MongoDB, and a bit of React.
- Developed 5 new core features for the platform which help user onboarding, secure payments, mobile responsiveness, and new functionality.
- Responsible for managing Git repository as well as overlook frontend deployments.
- Part of work done available at my work GitHub [🔗](#).

Projects

sillyhacks.online [🔗](#)

- Website for Silly Hacks, a part of MLH 2020 Hackathon season.
- **Technology Stack:** Gatsby, React.js, Tailwind CSS
